DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Waugh, Jr. (D 372,563). Waugh, Jr. shows protective animal cover comprising a vest-like trunk cover having a front upper opening and a rear opening which extends from the chest front to a point in the vicinity of the rear of the rib cage; a neck cover having an upper opening and a lower opening, the covering extending downwards from the upper neck to the front upper opening of the trunk cover; the trunk cover having at least one lower front opening to receive the front legs of a pet; the trunk cover and neck cover being connected to form a body sock which covers the front portion of the pet's body to cover an exposed or gauze-dressed wound.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 6-8 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Waugh, Jr. in view of Hibbert (6,070,557). Hibbert shows a protective animal cover

Art Unit: 3644

22 composed of a breathable elastic material which covers the front portion of an animal's body 20 having an upper opening 38, a rear opening 32 and two lower front openings 34, 36 to receive the legs of the pet. The openings have expandably stitched hems to accommodate the donning and removal of the garment. With respect to claim 3, to use the elastic material of Hibbert with the protective garment of Waugh, Jr. would have been obvious to one skilled in the art as a replacement of functional equivalents.

Allowable Subject Matter

Claims 4, 5 and 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 14-20 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference on protective animal garments are: Spatt (6,234,117) and Ross et al (6,481,383).
